# Examination for Selection Posts Phase VII 2019

Roll No.	WWW.QMATHS.IN
Registration No.	WWW.QMATHS.IN
Name	WWW.QMATHS.IN
Test Venue	iON Digital Zone iDZ 1 Sector 62
Test Time	4:00 PM - 5:00 PM
Test Date	15/10/2019
Subject	Selection Post Graduate Level

	कथन: कुछ बल्ब ट्यूबलाइट हैं।	
	कोई ट्यूबलाइट बटन नहीं है। कोई बल्ब घड़ी नहीं है।	
	निष्कर्ष:	
	l. कोई घड़ी ट्यूबलाइट नहीं है। ll. कुछ बल्ब बटन हैं।	
	।।।. कुछ ट्यूबलाइट बल्ब हैं।	
Ans	IV. कोई घड़ी बल्ब नहीं है। 1. केवल निष्कर्ष III और IV अनुसरण करते हैं।	
	🗙 १. केवल निष्कर्ष । और ।।। अनुसरण करते हैं।	
	🗙 3. केवल निष्कर्ष ॥ और ॥। अनुसरण करते हैं।	
	🗙 ४. या तो निष्कर्ष । या निष्कर्ष ।।। अनुसरण करता है।	
	🔨 મ. યા લા માપ્યાય ! યા માપ્યાય !!! અનુસરળ ધરલા ફા	
		Question ID : 5581012032
		Status : <b>Answered</b> Chosen Option : <b>1</b>
Q.4	गीता ने कहा, 'प्रतीक मेरे पति की इकलौती बेटी श्रीजा का भाई है।' अमित ने कह का बेटा है।' श्रीजा का अमित से क्या संबंध है?	त, 'प्रतीक मेरे बेटे की मां की मां

down inclined surfaces; Newton studied falling apples (or so legend has it) and the orbit of the moon. The goal of these investigations was to attune the nascent scientific ear to nature's harmonies. To be sure, physical reality was the stuff of experience, but the challenge was to hear the rhyme and reason behind the rhythm and regularity. Many sung and unsung heroes contributed to the rapid and impressive progress that was made, but Newton stole the show. With a handful of mathematical equations, he synthesized everything known about motion on earth and in the heavens, and in so doing, composed the score for what has come to be known as classical physics. In the decades following Newton's work, his equations were developed into elaborate mathematical structures that significantly extended both their reach and their practical utility. Classical physics gradually became a sophisticated and mature scientific discipline. But shining clearly through all these advances was the beacon of Newton's original insights.

#### SubQuestion No : 6

Ans

#### Q.6 The most significant contribution of the pioneers of science was to show that

 $\times$  X 1. Sometimes there were connections between human life and the cosmos

- 2. Man can find patterns in the universe
- imes 3. It was possible to study what was going to happen in the future
- X 4. Science cannot explain and predict the events of the universe

Question ID : **5581011836** Status : **Answered** Chosen Option : **1** 

#### **Comprehension:**

Read the passage and answer the questions given below it.

Historians differ on exactly when the modern scientific age began, but certainly by the time Galileo Galilei, Rene C Descartes, and Isaac Newton had had their say, it was briskly under way. In those days, the new scientific mind-set was being steadily forged, as patterns found in terrestrial and astronomical data made it increasingly clear that there is an order to all the comings and goings of the cosmos, an order accessible to careful reasoning and mathematical analysis. These early pioneers of modern scientific thought argued that, when looked at the right way, the happenings in the universe not only are explicable but predictable. The power of science to foretell aspects of the future-consistently and quantitatively-had been revealed. Early scientific study focused on the kinds of things one might see or experience in everyday life. Galileo dropped weights from a leaning tower (or so legend has it) and watched balls rolling down inclined surfaces; Newton studied falling apples (or so legend has it) and the orbit of the moon. The goal of these investigations was to attune the nascent scientific ear to nature's harmonies. To be sure, physical reality was the stuff of experience, but the challenge was to hear the rhyme and reason behind the rhythm and regularity. Many sung and unsung heroes contributed to the rapid and impressive progress that was made, but Newton stole the show. With a handful of mathematical equations, he synthesized everything known about motion on earth and in the heavens, and in so doing, composed the score for what has come to be known as classical physics. In the decades following Newton's work, his equations were developed into elaborate mathematical structures that significantly extended both their reach and their practical utility. Classical physics gradually became a sophisticated and mature scientific discipline. But shining clearly through all these advances was the beacon of Newton's original insights.

#### SubQuestion No: 7

#### Q.7 What played a major role in all the experiments of early scientists?

🗙 4. Dropping weights

Question ID : **5581011834** Status : **Answered** Chosen Option : **3**
