Section : **General Intelligence**

Q.1 Select the option that is embedded in the given figure (X) (Rotation is NOT allowed).

(X)

Ans

✗ 1.

✗ 2.

✓ 3.

✗ 4.

Question ID : 65497839553
 Status : **Answered**
 Chosen Option : 3

Q.2 In a certain code language, FORK is written as JKVG and COARSE is written as GKENWA. How will TERMITES be written in that language?

- Ans
- 1. XAVIMXAO
 - 2. XAVIMPIO
 - 3. PIVIMPIW
 - 4. YANIMPIO

Question ID : 65497839639
Status : Answered
Chosen Option : 2

Q.3 Select the number from among the given options that can replace the question mark (?) in the following series.

31, 35, 51, 87, 151, ?, 395

- Ans
- 1. 251
 - 2. 262
 - 3. 187
 - 4. 215

Question ID : 65497839548
Status : Answered
Chosen Option : 1

Q.4 Select the option that is related to the third letter-cluster in the same way as the second letter-cluster is related to the first letter-cluster.

PUZKR : TPFZD :: KRTOD : ?

- Ans
- 1. PNZHL
 - 2. OMYIL
 - 3. OMZHM
 - 4. OMZHL

Question ID : 65497839531
Status : Answered
Chosen Option : 4

Q.5 Select the combination of letters that when sequentially placed in the blanks of the given series will complete the series.

b _ c _ d _ k b _ _ a _ e k b b _ a d _ k

- Ans
- 1. baebcdec
 - 2. beabcdce
 - 3. baebcdce
 - 4. baedcdck

Question ID : 65497839543
Status : Not Attempted and Marked For Review
Chosen Option : --

Q.6 Select the correct option that indicates the arrangement of the given words in the order in which they appear in an English dictionary.

1. Letter
2. Lexicon
3. Latitude
4. Leverage
5. Lovable
6. Levy
7. Latent

- Ans
- 1. 7, 3, 1, 6, 4, 2, 5
 - 2. 7, 3, 1, 2, 6, 4, 5
 - 3. 7, 3, 1, 4, 2, 6, 5
 - 4. 7, 3, 1, 4, 6, 2, 5

Question ID : 65497839635
Status : Marked For Review
Chosen Option : 4

Q.7 In a certain code language, SICK is coded as 168 and TAR is coded as 117. How will NOMAD be coded in that language?

- Ans
- 1. 235
 - 2. 290
 - 3. 245
 - 4. 321

Question ID : 65497839540
Status : Not Answered
Chosen Option : --

Q.8 Select the option that is related to the third word in the same way as the second word is related to the first word.

Pulmonologists : Lungs :: Nephrologists : ?

- Ans
- 1. Testes
 - 2. Liver
 - 3. Kidneys
 - 4. Bones

Question ID : 65497839637
Status : Answered
Chosen Option : 3

Q.9 In a certain code language, 'BROTHER' is written as CSQUIGS and 'MAGIC' is written as NCHKD. How will 'SWEATING' be written in that language?

- Ans
- 1. TYGCVKOH
 - 2. TXGBUKOI
 - 3. TXFCUJOH
 - 4. TXGCUKOH

Question ID : 65497839436
Status : Answered
Chosen Option : 2

Q.10 In a certain code language, FROLIC is written as ROLIFC and LOBSTER is written as TSROLEB. How will MANGROVE be written in that language?

- Ans
- 1. RVNOMGEA
 - 2. VORMNGEA
 - 3. VRONGMEA
 - 4. VRONMGEA

Question ID : 65497839536
Status : Not Answered
Chosen Option : --

Q.11 Read the given statements and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statements.

Statements:

Some handkerchiefs are plastics.
All clothes are handkerchiefs.
All utensils are clothes.

Conclusions:

I. Some plastics are handkerchiefs.
II. All utensils are plastics.
III. Some handkerchiefs are utensils.

- Ans
- 1. Only Conclusions I and III follow.
 - 2. Only Conclusion I follows.
 - 3. Only Conclusions II and III follow.
 - 4. Only Conclusions I and II follow.

Question ID : 65497839444
Status : Marked For Review
Chosen Option : 1

Q.12 In a certain code language, ROCKET is coded as 184311220 and PLUNGE is coded as 161251472. How will TANGLE be coded in that language?

- Ans
- 1. 201648122
 - 2. 201147125
 - 3. 201147122
 - 4. 201137122

Question ID : 65497839541
Status : Answered
Chosen Option : 2

Q.13 Select the option that is related to the third word in the same way as the second word is related to the first word.

Professor : Education :: Soldier : ?

- Ans
- 1. Country
 - 2. Defence
 - 3. Patriotism
 - 4. Uniform

Question ID : 65497839534
Status : Answered
Chosen Option : 2

Q.14 In a family, N's wife H is the only daughter of G. D and R are brothers. J's father is married to P's daughter. V's only sister G is married to P. R is the son of P. Which of the following statements is correct?

- Ans
- 1. V is the paternal aunt of H.
 - 2. G is the father of N.
 - 3. P is the maternal grandfather of J.
 - 4. D is the son of N.

Question ID : 65497839545
Status : Not Answered
Chosen Option : --

Q.15 Select the correct option that indicates the arrangement of the given words in a logical and meaningful order.

1. Tiger
2. Dog
3. Ant
4. Elephant
5. Sparrow
6. Centipede

- Ans
- 1. 3, 2, 5, 6, 1, 4
 - 2. 3, 6, 5, 1, 2, 4
 - 3. 3, 6, 5, 2, 1, 4
 - 4. 3, 4, 5, 2, 6, 1

Question ID : 65497839532
Status : Answered
Chosen Option : 3

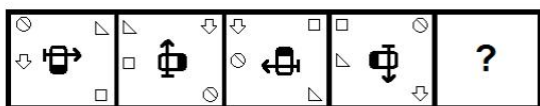

Q.16 Select the option that is related to the third term in the same way as the second term is related to the first term.

DANIEL : NLIEDA :: BROTHER : ?

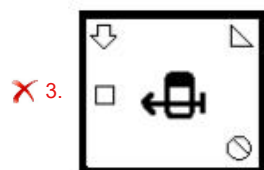

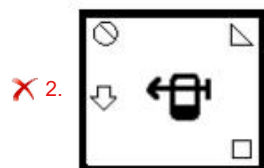

- Ans
- 1. TORRHEB
 - 2. TQOOHEB
 - 3. TRROHEB
 - 4. TRROEHB

Question ID : 65497839742
Status : Not Answered
Chosen Option : --

Q.17 Select the figure from among the given options that can replace the question mark (?) in the following series.

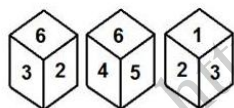

Ans

 Status : Answered
 Chosen Option : 4

Q.18 Three different positions of the same dice are shown, the six faces of which are numbered from 1 to 6. Select the number that will be on the face opposite to the one having '1'.

- Ans**
- ✗ 1. 4
 - ✓ 2. 6
 - ✗ 3. 3
 - ✗ 4. 5

Question ID : 65497839654
 Status : Answered
 Chosen Option : 2

Q.19 Read the given statements and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statements.

Statements:

Some dolls are rockets.
Some rockets are engines.
All engines are solids.

Conclusions:

I. No doll is solid.
II. No solid is an engine.
III. Some dolls are solid.
IV. No engine is a rocket.

- Ans**
- 1. Only conclusions II and IV follow.
 - 2. Either conclusion II or III follows.
 - 3. Only conclusions I and III follow.
 - 4. Either conclusion I or III follows.

SubQuestion No : 20

Q.20 Select the most appropriate option to fill in blank no. 5.

- Ans
- 1. alertness
 - 2. awareness
 - 3. aloofness
 - 4. attentiveness

Question ID : 65497839575

Status : Answered

Chosen Option : 2

Comprehension:

Read the given passage and answer the questions that follow.

Floods are not new to India and this sub-continent, but in recent years the problem has received much greater attention perhaps largely because it has led to much greater damage than in the past. Even though information on the impending occurrence of floods is now more accurate and certainly timelier, often there is very little time or support infrastructure in place by which damage can be minimised. This is particularly true in the case of flash floods resulting from sudden and excessively heavy rain.

In the case of India, flooding is very much a function of the seasonal nature of our rainfall. The monsoons are spread over a short period during the year and often bring a concentrated volume of rain, which cannot be absorbed by the earth and finds outlet only in the form of streams that join up with our major river systems. But, flooding is not confined only to the main rivers of the country, often smaller tributaries and streams can cause heavy damage as well. Once these streams spill over their banks they could cause excessive harm, mainly because those living near the banks of these streams particularly in mountain areas do not have easy recourse to moving away quickly.

One major factor that could lead to a higher severity of flooding in the future is the danger of climate change. While the evidence of the nature of impacts resulting from climate change on precipitation and flooding at the regional level is not entirely clear, it could happen that the Indian subcontinent witnesses and suffers the effects of a significantly changed pattern of monsoons. One set of scientists has estimated that the monsoons could be shorter in duration, but far more intensive. In other words, much greater precipitation would take place in a much shorter period of time, thereby increasing the danger of floods. Climate change is the result of human actions through the increased concentration of greenhouse gases in the atmosphere, of which carbon dioxide is the most prominent.

At the local level also human actions have heightened the danger of flood through the cutting of trees in the mountains as well as in the plains. In the case of India, the ecological damage through deforestation of the Himalayas has led to large-scale erosion of the mountain slopes and high levels of siltation. This leads to deposition of silt on the riverbeds in the plains and hence spill-over of water whenever the volume in the river reaches a certain level. With siltation on the river beds, flooding occurs even at very shallow water levels. However, even in cases where forecasts have been timely and generally accurate, people have often been reluctant to move away, because in most cases they lack the means and physical options for moving away from a danger zone to one that is relatively safe. In the case of flash floods, forecasts are difficult to make, and often the time available for relief is very short.

SubQuestion No : 21

Q.21 Which of the following human actions increases the danger of flooding?

- Ans
- 1. Concentration of carbon dioxide in the atmosphere
 - 2. Timely and accurate weather forecasts
 - 3. Lack of means for evacuating people
 - 4. Deforestation in plains and mountains

Question ID : 65497839478

Status : Answered

Chosen Option : 4

Comprehension:

In the case of flash floods, forecasts are difficult to make, and often the time available for relief is very short.

SubQuestion No : 23

Q.23 Which of the following is a consequence of siltation on river beds?

- Ans
- 1. Relief from water spill-over
 - 2. Flooding even at shallow water levels
 - 3. Deforestation of the Himalayas
 - 4. Erosion of the mountain slopes

Question ID : 65497839479

Status : **Marked For Review**

Chosen Option : 2

Comprehension:

Read the given passage and answer the questions that follow.

Floods are not new to India and this sub-continent, but in recent years the problem has received much greater attention perhaps largely because it has led to much greater damage than in the past. Even though information on the impending occurrence of floods is now more accurate and certainly timelier, often there is very little time or support infrastructure in place by which damage can be minimised. This is particularly true in the case of flash floods resulting from sudden and excessively heavy rain.

In the case of India, flooding is very much a function of the seasonal nature of our rainfall. The monsoons are spread over a short period during the year and often bring a concentrated volume of rain, which cannot be absorbed by the earth and finds outlet only in the form of streams that join up with our major river systems. But, flooding is not confined only to the main rivers of the country, often smaller tributaries and streams can cause heavy damage as well. Once these streams spill over their banks they could cause excessive harm, mainly because those living near the banks of these streams particularly in mountain areas do not have easy recourse to moving away quickly.

One major factor that could lead to a higher severity of flooding in the future is the danger of climate change. While the evidence of the nature of impacts resulting from climate change on precipitation and flooding at the regional level is not entirely clear, it could happen that the Indian subcontinent witnesses and suffers the effects of a significantly changed pattern of monsoons. One set of scientists has estimated that the monsoons could be shorter in duration, but far more intensive. In other words, much greater precipitation would take place in a much shorter period of time, thereby increasing the danger of floods. Climate change is the result of human actions through the increased concentration of greenhouse gases in the atmosphere, of which carbon dioxide is the most prominent.

At the local level also human actions have heightened the danger of flood through the cutting of trees in the mountains as well as in the plains. In the case of India, the ecological damage through deforestation of the Himalayas has led to large-scale erosion of the mountain slopes and high levels of siltation. This leads to deposition of silt on the riverbeds in the plains and hence spill-over of water whenever the volume in the river reaches a certain level. With siltation on the river beds, flooding occurs even at very shallow water levels. However, even in cases where forecasts have been timely and generally accurate, people have often been reluctant to move away, because in most cases they lack the means and physical options for moving away from a danger zone to one that is relatively safe. In the case of flash floods, forecasts are difficult to make, and often the time available for relief is very short.

SubQuestion No : 24

Q.24 Which of the following predictions made by certain scientists creates a larger threat of floods in India?

- Ans**
- 1. Increased water level in streams
 - 2. Prolonged precipitation
 - 3. Heavy monsoon over a shorter period than usual
 - 4. Increase in greenhouse gases
