# Read the following passage and answer the questions that follow:

'I'm too fat. I'm too thin. My nose is too big. I've got blotches on my skin. I don't like my legs.' Is there anyone on earth who is completely satisfied with how they look? Most of us would like to change something about ourselves. Our self-esteem, in other words, how much we like ourselves, is very often based on how we think we look. If we are not happy with our looks, we feel unhappy with ourselves.

Young people, especially girls, see beautiful models on TV or in magazines and think, 'I want to look like that too.' They imagine that if they were slim and beautiful, their lives would be better. Of course, there is nothing wrong with making the best of what we've got. But problems start when we become so selfconscious about how we look that we make ourselves unhappy. The way we think we look is often not the way others see us. We may think we have fat legs or our eyes are too small, or there isn't enough muscle on the biceps. But, when someone looks at you, they see the whole person and not one particular feature. We are all different and how we look has a lot to do with heredity. We may have the same build as our mother or father and there is not a lot we can do about it. You may not believe this, but being good looking does not mean being happy. Happiness is something that comes from how you feel inside not how you look.

'मैं बह्त मोटा हूँ। मैं बह्त पतला हूँ। मेरी नाक बह्त बड़ी है। मेरी त्वचा पर मुहासे हो गए हैं। मुझे अपने पैर पसंद नहीं है।' क्या पृथ्वी पर कोई भी ऐसा व्यक्ति है जो इस बात से पूरी तरह से संतुष्ट है कि वह कैसे दिखता है? हम में से अधिकांश अपने बारे में कुछ बदलना चाहते हैं। हमारा आत्म-सम्मान, दूसरे शब्दों में, हम अपने आपको कितना पसंद करते हैं, यह प्राय: इस बात पर आधारित होता है कि हम इस बारे में कैसा सोचते हैं कि हम कैसे दिखते हैं। यदि हम अपने आकार से खुश नहीं हैं तो हम अपने आपसे नाखुश महसूस करते हैं। युवा टयक्ति, विशेष रूप से लड़कियां, टीवी पर या पत्रिकाओं में सुंदर मॉडल देखते हैं और सोचते हैं, 'मैं भी ऐसा ही दिखना चाहता हूं।' वे कल्पना करते हैं कि यदि वे पतले और सुंदर होते तो उनका जीवन बेहतर होगा। बेशक, हमें जो कुछ मिला है उसे सर्वश्रेष्ठ बनाने में कुछ भी गलत नहीं है। परंतु समस्या तब श्रू होती है जब हम कैसे दिखते हैं, के बारे में इतने अधिक आत्म - जागरूक हो जाते हैं कि हम अपने आपको नाखुश बनाते हैं। जिस तरह से हम सोचते हैं कि हम प्राय: कैसे दिखते हैं, वैसे ही अन्य लोग हमें देखते नहीं हैं। हम सोच सकते हैं कि हमारे पैर मोटे हैं या हमारी आंखें बह्त छोटी हैं या द्विआधारी पेशी पर पर्याप्त मांसपेशी नहीं है। परंतु, जब कोई आपको देखता है तो वह सम्पूर्ण ट्यक्ति को देखता है, न कि एक विशेष फीचर पर। हम सभी अलग अलग हैं और हम कैसे दिखते है, यह आनुवंशिकता के आधार पर बहुत कुछ निर्भर करता है। हमारी संगठन हमारी मां या पिता के समान हो सकता है और हम इस बारे में बहुत कुछ नहीं कर सकते हैं। आप इस पर विश्वास नहीं कर सकते हैं, परंतु अच्छा लगने का तात्पर्य खुशी होने से नहीं है। प्रसन्नता कुछ ऐसी चीज है जो आप कैसे महसूस करते हैं से आती है न कि आप कैसे दिखते हैं, से आती हैं।

# Question Number: 77 Question Id: 932494324 Question Type: TYPING TEST Display Question Number: Yes

Motivation is the foundation stone of all athletic efforts and accomplishments. Without a sheer desire and determination to improve your sports performances, all of the other mental factors are meaningless. To become the best athlete, you must be motivated to do what it takes to maximize your ability and achieve the desired goals. Motivation can be simply defined as the ability to initiate and persist at a task. To perform your best, you must have the zeal to continually improve your efforts, until and unless you do not achieve your goals. While you practice, you will face endless amount of fatigue, boredom, pain, and the desire to do other things. Getting distracted would be very easy for you. This is the reason why motivation is so important in sports. It will impact everything that influences your sports performance, for example, physical conditioning, technical and tactical training, mental preparation, and general lifestyle. Further, motivation is the only contributor to sports performance, over which you have complete control. There are three things that affect how well you perform. The first and foremost factor is your ability that includes physical, technical, tactical, and mental capabilities. Second factor is the difficulty of the competition. The term difficulty here refers to the ability of the opponent, crowd, weather and other such external factors to influence your performance. You have no control over these factors. Finally, the third factor is motivation, which is completely under your control. Motivation will directly impact the level of success that you ultimately achieve. If you are highly motivated to improve your performances, then you will put in the time and effort necessary to raise your game. Eventually, you will succeed in your career. Reports say that athletes, who consistently fail to achieve their targets, are generally diagnosed with several signs of low motivation. Some of the major signs or symptoms include a lack of desire to practice as much as you should, less than hundred percent efforts in training, skipping training sessions and investing in efforts that are inconsistent with your goals. So just beware of such signs and concentrate on prime motivation, which begins with direction, decision and dedication. It is very important to consider the different directions you can go in your sport. You will have three choices, stop participating completely, continue at your current level, or strive to be the best athlete you can be. With these three choices of direction, you must select one direction in which to go. Your choice will dictate the amount of time and effort you will put into your sport and how good an athlete you will ultimately become. Once you have made your decision, you must dedicate yourself to it.
