Question Number : 30 Question Id : 973597623 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

C 4 1 W 0

Correct: 1 Wrong: 0

Which of the following is NOT a correct match for the file search query File*Name.pdf?

Options:

- FileName.pdf
- File1Name.pdf
- 3 FileName1.pdf
- File12Name.pdf

Question Number : 30 Question Id : 973597623 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Correct: 1 Wrong: 0

निम्नलिखित में से कौन सा विकल्प फाइल सर्च क्वेरी File+Name.pdf का सही मिलान नहीं है?

Options:
1. * FileName.pdf
2. * File1Name.pdf
_{3. ✓} FileName1.pdf
4. * File12Name.pdf
Question Number: 31 Question Id: 973597624 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Correct: 1 Wrong: 0
Folders and Files in a Windows system are organized into structure.
Options:
1. * Linear
2. V Tree
3. * Directed Graph
4. * Undirected Graph
Question Number : 31 Question Id : 973597624 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical Correct : 1 Wrong : 0 विंडोज सिस्टम में फाइल्स और फोल्डर्स स्ट्रक्चर में ऑर्गनाइज्ड होते हैं।
Options:
1. 🗱 लीनियर
_{2. ✔} ट्री
3. 🙎 डाइरेक्टेड ग्राफ
4. 🗱 अनडाइरेक्टेड ग्राफ
Question Number: 32 Question Id: 973597625 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Correct: 1 Wrong: 0 Which of the following categories of files can be encrypted in Windows Encrypted File System (EFS)?
Options:
1. * Root directories
2. * System files
3. Sparse files
4. * Compressed files

Read the following passage and answer the questions given after it.

Madame Marie Curie was one of first woman scientists and one of the great scientists of the 20th century. She discovered radium and paved the way to nuclear physics and cancer therapy.

Madame Curie was born in 1867 in Warsaw, Poland. Marie went to Paris, France, to study physics, mathematics and chemistry, where she met Pierre Curie, who was a professor in the School of Physics. They were married in 1895. She received her Doctor of Science Degree and after Pierre Curie's death, she became the first woman Professor of General Physics in the Faculty of Sciences.

Handling minerals, Madame Curie noticed that Thorium was *radioactive*. Pierre had tested radium on his skin, which caused a burn. They realized radium's effect on humans and Madame Curie and Pierre Curie won the Nobel Prize for Physics in 1903 for their study of radium. Madame Curie also received the Nobel Prize for Chemistry in 1911 for her study of radioactivity.

Madame Curie had to fight prejudices of her time. When in 1910 Madame Curies competed for the membership of the Academy of Sciences, it was an all-male society. In 1911 Madame Curie lost her bid for membership in the Academy of Sciences. She was furious and never tried to join again. It was not until 1979 that the Academy of sciences could accept a woman.

After having been exposed, in her research, to incredible levels of radiation, Madame Curie developed leukemia and died on 4 July 1934 in France. Madame Curie was the only woman laid to rest alongside Victor Hugo and other great figures under the famous dome of the Pantheon in Paris for her own merits.

दिए गए पाठ्यांश को पढ़ें और इस पर आधारित प्रश्नों के उत्तर दें।

मैडम मैरी क्यूरी पहली महिला वैज्ञानिकों में से एक और 20वीं सदी के
महान वैज्ञानिकों में से एक थीं। उन्होंने रेडियम की खोज की और
नाभिकीय भौतिकी तथा कैंसर के उपचार का मार्ग प्रशस्त किया। मैडम
क्यूरी का जन्म 1867 में वारसाँ, पोलैंड में हुआ था। मैरी भौतिक
विज्ञान, गणित और रसायन विज्ञान का अध्ययन करने के लिए पेरिस,
फांस गई जहां वे पियरे क्यूरी से मिलीं जो स्कूल ऑफ़ फिजिक्स में
प्राध्यापक थे। उन्होंने 1895 में शादी की। उन्होंने डॉक्टर ऑफ़ साइंस
की डिग्री प्राप्त की और पियरे क्यूरी की मृत्यु के बाद फैकल्टी ऑफ
साइंसेज में जनरल फिजिक्स की पहली महिला प्रोफेसर बनी।

खिनजों पर काम करते हुए मैडम क्यूरी ने देखा कि थोरियम रेडियोधर्मी है। पियरे ने अपनी त्वचा पर रेडियम का परीक्षण किया जिससे त्वचा झुलस गई थी। उन्होंने मनुष्यों पर रेडियम प्रभाव संपादित किया और रेडियम पर अपने अध्ययन के लिए मैडम क्यूरी तथा पियरे क्यूरी ने 1903 में भौतिकी का नोबेल पुरस्कार प्राप्त किया। मैडम क्यूरी ने रेडियोधर्मिता पर अपने अध्ययन के लिए 1911 में रसायन विज्ञान का नोबेल पुरस्कार भी प्राप्त किया।

मैडम क्यूरी को अपने समय की पूर्वधारणाओं से मुकाबला करना पड़ा था। जब 1910 में मैडम क्यूरी ने एकेडमी ऑफ साइंसेज की सदस्यता के लिए प्रयत्न किया था, तो उस समय वह केवल पुरुषों की संस्था थी। 1911 में मैडम क्यूरी का एकेडमी ऑफ साइंसेज में सदस्यता पाने का प्रयास असफल रहा। वह अत्यंत क्रोधित हुईं और फिर कभी इससे जुड़ने का प्रयास नहीं किया। 1979 तक एकेडमी ऑफ साइंसेज ने किसी भी महिला को स्वीकार नहीं किया था।

अपने शोध में अत्यधिक मात्रा में विकिरण के संपर्क में आने के कारण मैडम क्यूरी को ल्यूकेमिया हो गया तथा 4 जुलाई 1934 को फ्रांस में उनका देहांत हो गया। मैडम क्यूरी अकेली ऐसी महिला हैं जिन्हें उनके विशेष गुणों के लिए पेरिस के प्रसिद्ध पेंथियन गुंबद के नीचे विक्टर ह्यूगो और अन्य महान लोगों के साथ दफनाया गया। Question Number: 53 Question Id: 973597647 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical

The Centre has done well to appoint the World Bank's water and sanitation specialist, Parameshwaran Iyer, as the new secretary of its drinking water and sanitation department. In the World Bank, everyone calls this program manager and lead water and sanitation specialist as Param, a 1981 batch IAS. It is also expected that this appointment may encourage many other former IAS officers currently specializing in key sectors such as health, infrastructure, finance, banking etc. either in India or abroad, to explore a second innings in the corridors. Ditto for the Delhi government that has given PWD engineer-in-chief Sarvagya Srivastava the charge of secretary, Public Works Department. However, both the Centre and states must move beyond sporadic and isolated appointments of domain experts into institutionalising lateral entry in senior positions. Countries such as the US, UK, Australia, Belgium and the Netherlands appoint people to identified senior positions in government from a wide pool that includes qualified personnel from all walks. That's the ideal way to pick the right person for the job. As India rapidly globalises, many fields will also become increasingly complex, requiring competence developed outside the government. A person who has all through her career looked after culture and human resources development may not be best equipped to become the finance secretary just because she is an IAS officer. India should move away from a closed system to an open system. The point really is to free the administrative machinery from the control of 'services'. Sensibly, the second administrative reforms commission had suggested a shift from a career-based approach to a post-based approach in the top tier of government jobs, but, unfortunately, it was not followed up. Civil servants must compete with domain experts from outside government, apart from other cadres within, for senior positions. The best way to go about this is to assign personnel to a common pool after some years of service in their specific areas. Further promotions should be contingent on their making the cut for specific posts. India is unable to spend its defence modernisation budget, says a report in this newspaper. Out of a current year allocation of Rs 63,675 crore, 40 percent remained unspent by end-December. This is bad not just for upgrading defence capability but also for Indian research and development and for Indian manufacturing. It is time defence re-imagined its entire strategy for procurement, using a portion of its typically large outlays to stimulate R&D in universities and specialised labs and private companies, and to give Indian companies, big and small, a chance to become suppliers of parts and equipment on a scale much larger than what obtains today. The key is to create an Indian equivalent of the Americans' Darpa.
