Read the given passage and answer the questions that follow.

Dunlop Tyres

It was the year 1888. Young John Boyd Dunlop stood watching his little son riding his tricycle on solid rubber tyres over cobbled ground.

He noticed that his son could not ride fast and was not comfortable at all. So to make his ride comfortable he took his tricycle and wrapped the wheels with thin rubber sheets, glued them together and inflated them with a football pump.

A year later, Dunlop's son had to participate in a racing event on a bicycle. Dunlop used the same idea to cover the wheels.

Sure enough, the boy raced far ahead of his rivals ---so smooth was his ride.

In his effort to give his son a smooth ride, Dunlop had invented something which was going to take the world by storm. He had not only invented the first air cushioning system but also laid the foundation for the first pneumatic tyre.

Dunlop saw great opportunity in this. He immediately patented his idea and decided to develop it into a commercial venture, thus founding the famous Dunlop Pneumatic Tyre Co. Ltd.

There was no looking back for Dunlop. Starting in 1890 with the first tyre plant in Dublin, Ireland he went on to expand his business to other countries across Europe Asia, Australia and the US.

In twenty years' time he had made the solid tyre obsolete. He had now established the first global multinational company which manufactured worldwide, and sold worldwide.

In keeping with its founding father's entrepreneurial spirit, the company realised that to be a successful multinational corporation the company would have to remain a pioneer in research and development as well as in business. Dunlop's objective was to continuously produce better products to enhance the performance of vehicles and the driving experience of its drivers.

By the start of World war II Dunlop became a buzz word for success. It was manufacturing not just tyres but also brakes, wheels, golf and tennis balls, flooring and other industrial rubber products.

It was a supremacy that was to last until the end of the 1960s.

दिया गया गदयखंड पढ़ें और निम्न प्रश्नों के उत्तर दें।

डनलप टायर्स

यह वर्ष 1888 था। तरुण जॉन बॉयड डनलप अपने छोटे बेटे को कंकर भरे मैदान पर ठोस रबड़ टायरों पर उसकी ट्राइसाइकिल की सवारी करते हुए देख रहा था।

उसने देखा कि उसका बेटा तेजी से सवारी नहीं कर पा रहा था और उसे बिल्कुल भी आरामदायक नहीं लग रहा था। तो उसकी सवारी आरामदायक बनाने के लिए उसने उसकी ट्राइसाइकिल ली और पहियों पर पतली रबर की शीटें लपेट दी, उन्हें एक साथ चिपकाया और उन्हें फुटबॉल पंप के साथ फुलाया।

एक साल बाद, इनलप के बेटे को साइकिल पर रेसिंग इवेंट में भाग लेना था। इनलप ने पहियों को ढँकने के लिए उसी विचार का इस्तेमाल किया।

निश्चित रूप से, लड़का अपने प्रतिद्वंद्वियों से बहुत आगे गया ---उसकी सवारी बहुत आसान थी।

अपने बेटे को एक आसान सवारी देने के अपने प्रयास में, डनलप ने कुछ ऐसा आविष्कार किया था जो दुनिया में हलचल मचा देनेवाला था। उन्होंने न केवल पहली एयर कुशनिंग प्रणाली का आविष्कार किया था बल्कि पहले न्यूमेटिक टायर की नींव भी रखी।

इनलप ने इसमें महान अवसर देखा। उन्होंने तुरंत अपने विचार को पेटेंट किया और इसे एक व्यावसायिक उद्यम में विकसित करने का फैसला किया, इस प्रकार प्रसिद्ध इनलप न्यूमेटिक टायर कंपनी लिमिटेड की स्थापना की।

डनलप के लिए वापस पीछे नहीं देखना था। डबलिन, आयरलैंड में पहले टायर प्लांट के साथ 1890 में शुरू करके, वे यूरोप, एशिया, ऑस्ट्रेलिया और अमेरिका के अन्य देशों में अपने ट्यापार का विस्तार करते गए।

बीस साल के समय में उन्होंने ठोस टायर को अप्रचलित कर दिया था। उन्होंने अब पहली वैश्विक बहुराष्ट्रीय कंपनी की स्थापना की थी जिसने दुनियाभर में निर्माण किया, और दुनियाभर में बेचा। अपने संस्थापक पिता की उद्यमी भावना को ध्यान में रखते हुए, कंपनी ने समझ लिया कि एक सफल मल्टीनेशनल कॉर्पोरेशन होने के लिए कंपनी को अनुसंधान और विकास के साथ-साथ ट्यवसाय में भी अग्रणी होना होगा। इनलप का उद्देश्य वाहनों के प्रदर्शन और इसके ड्राइवरों के ड्राइविंग अनुभव को बढ़ाने के लिए लगातार बेहतर उत्पादों का उत्पादन करना था।

विश्व युद्ध ॥ की शुरुआत तक इनलप सफलता के लिए एक चर्चा का विषय बन गया। यह न केवल टायर बल्कि ब्रेक, पहियों, गोल्फ और टेनिस गेंदों, फर्श और अन्य औद्योगिक रबर उत्पादों का निर्माण कर रहा था।

यह एक सर्वोच्चता थी जो 1960 के अंत तक चली।

Good manners are defined as courteous behaviour of a person. A person having good manners is polite and socially acceptable. He possesses a behaviour that is liked by all and which shows respect towards all classes of society. Importance of good manners can be classified into two parts. Here is a look at both these categories to understand them well. The first in the list is importance of good manners in social life. Good Manners are a kind of way to interact with people. It is more of an art and everyone must learn to behave well. Some common and known advantages of good manners are that a person with good manners is loved by all, he or she becomes more desirable, he or she easily gets favors from everyone in the hour of need and also draws attention. Nowadays, with proper learning and practice everyone can learn to behave decently. One can easily pretend to be well mannered, but the real test of being genuine comes in adverse situations, where you could easily lose your mind. O, try to be kind and respectful all the times. Good manners are also important in professional life. In job interviews, the employer clearly notices the etiquettes and behaviour of a person. This is the reason why most of the candidates fail to crack the interview, despite having immense technical knowledge. Hence, if you lack good manners during interview, you may lose a golden opportunity in your career. Even though people are aware how important it is to behave properly, they fail at times maybe because their brain is not habitual of keeping their behaviour in tact due to nervousness. One of the reasons for this is that we do not practice being mannered in our day to day lives.
