Read the following passage and answer the questions given below:

The origins of cricket are obscure, and there are several theories on how it started. The shepherds used to play it, with one standing in front of the wicket gate to the sheepfold, and another bowling a stone or something at him, and he would have to hit it with his 'crook'. Another theory is that it derives from a game called club-ball. As well as shepherds' crooks, early bats were clubs and sticks. There gave way to long, thin 'bates', which looked a bit like straightened-out hockey sticks. By the beginning of the 18th century, the 'batte' had developed into a longer, heavier, curved version of the one we know now, carved out of a single piece of wood. Today's bat was invented around 1853, with the blade made of willow, and a cane handle, which is layered with strips of rubber, tied with twine, and covered with rubber to make a grip. The early balls were stones and other missiles. They're now made of cork, and covered with hand-stitched leather quarters dyed red. The wicket- the stumps are the three posts. Originally there were two, and at one point, four. The size has varied too-in the 17th century, were up to two metres wide! The bails are the two bits of wood on the top, and if they fall off, it's all over!

Tellicherry in North Kerala found a place in the world (cricket) map when the 200th anniversary of the first-ever match played in India was celebrated there recently. According to history, Sir Arthur Wellesley - who defeated Napoleon at Waterloo-came to Tellicherry in the late 1790s as the military head of the East India Company in Malabar, Canara, and Mysore. It can be assumed that the Englishmen carried their cricket kits along with their gun-cases and played their first match in Tellicherry in 1802. The games caught the imagination of the local people even after the Englishmen left the area. However, the Tellicherry Cricket Club was formed only in 1860.

निम्नलिखित लेख पढ़ें और नीचे दिए गए प्रश्नों के उत्तर दें:

क्रिकेट की उत्पत्ति कहाँ से हुई, अभी तक यह अस्पष्ट है, और इस बात के कई सिदांत हैं कि यह कैसे शुरू ह्आ था। चरवाहों इसे खेला करते थे, जिसमें एक चरवाहा भेड़ हाँकने की छड़ी लेकर विकेट गेट के सामने खड़ा हो जाता था, और दूसरा उसकी ओर एक पत्थर या कुछ फेंकता था, और पहले लड़के को अपनी 'छड़ी' से उसे मारना होता था। एक अन्य सिद्धांत यह है कि यह क्लब-बॉल नामक गेम से निकला है। साथ ही चरवाहों की छड़ें, शुरुआती बल्ले डंडे और लाठियाँ होते थे। धीरे-धीरे इस लंबे, पतले 'बल्ले' ने हॉकी स्टिक की तरह दिखने वाली छड़ी का आकार ले लिया। 18 वीं शताब्दी की शुरुआत से, 'बल्ले' को अब तक लकड़ी के एक टुकड़े से तैयार किए एक लंबे, भारी, घुमावदार संस्करण में विकसित किया जा चुका था, जिसे आज हम पहचानते हैं। आज के बल्ले का आविष्कार 1853 के आसपास किया गया था, जिसमें ब्लेड विलो से बना हुआ था, और एक गन्ने के आकार का हैंडल था, जिस पर रबर के स्ट्रिप्स चढ़ाये गये हैं, जो सुतली से बंधा है, और पकड़ बनाने के लिए रबड़ से ढका होता है। शुरुआती गेंदें पत्थर और अन्य प्रक्षेपास थे। अब वे कॉर्क के बने होते हैं, और हाथों से खीचें गये लाल रंग के चमड़े से कवर होते हैं। विकेट- स्टंप तीन होते हैं। मूल रूप से दो थे, और एक समय, चार भी थे। 17 वीं शताब्दी में भी आकार भिन्न होता है, दो मीटर चौड़े होते थे। बेल्स शीर्ष पर लकड़ी के दो टुकड़े होते हैं, और यदि वे गिर जाती हैं, तो सब समाप्त हो जाता है।

उत्तरी केरल में तेल्लीचेरी को विश्व (क्रिकेट) के मानचित्र स्थान प्राप्त हुआ, जब भारत में खेले गए पहले मैच की 200 वीं वर्षगांठ वहां हाल ही में मनाई गई थी। इतिहास के अनुसार, सर आर्थर वेलेस्ली - जिसने वाल्टरू में नेपोलियन को हराया था- 1790 के उत्तरार्ध में तेल्लीचेरी में आया था, क्योंकि मालाबार, कैनारा और मैसूर में ईस्ट इंडिया कंपनी के सैन्य प्रमुख थे। यह माना जा सकता है कि अंग्रेज अपने बंदूक बक्सों के साथ अपनी क्रिकेट किट भी लाये थे और 1802 में तेल्लीचेरी में अपना पहला मैच खेला था। अंग्रेजों द्वारा इस क्षेत्र को छोड़ने के बाद भी यह खेल स्थानीय लोगों की यादों में बस चुका था। हालांकि, तेल्लीचेरी क्रिकेट क्लब का गठन 1860 में हुआ था।

Operation Wrath of God, also called Operation Bayonet, was a covert operation directed by Israel and its security agency, Mossad, to assassinate individuals alleged to have been directly or indirectly involved in the massacre of Israeli athletes at the 1972 Munich Olympics. Their targets included members of the Palestinian militant group Black September, who were responsible for the Munich attack, and members of the Palestine Liberation Organization accused of involvement. Authorized to begin by Israeli Prime Minister Golda Meir in the autumn of 1972, the operation may have continued for more than 20 years. During this time, covert Israeli assassination units killed dozens of Palestinians and Arabs across Europe, including the mistaken murder of an innocent waiter in Lillehammer, Norway. An additional military assault was launched by Israeli commandos deep inside Lebanon to kill several high profile Palestinian targets. This string of assassinations spurred retaliatory attacks by Black September against a variety of Israeli government targets around the world. It has also prompted criticism of Israel for its choice of targets, tactic of assassination, and overall effectiveness. Because of the secretive nature of the operation, some details are unverifiable beyond a single source. For many, the Munich massacre, Israels retaliation, and Palestinian Counter retaliation epitomized the seemingly never ending cycle of violence in the Arab Israeli conflict that continues in different forms today. This operation was outcome of the massacre of 11 Israeli athletes at the 1972 Summer Olympics by the Palestinian terrorist group Black September. Soon after the incident, Prime Minister Golda Meir created Committee X, a small group of government officials tasked with formulating an Israeli response, with herself and Defense Minister Moshe Dayan at the head. She also appointed General Aharon Yariv as her Adviser on Counterterrorism. He, along with Mossad Director Zvi Zamir, took the principal role in directing the ensuing operation. The committee came to the conclusion that to deter future terrorist incidents against Israel they needed to assassinate those who had supported or carried out the Munich massacre, and in dramatic fashion. Pressured by Israeli public opinion and top intelligence officials, Meir reluctantly authorized the beginning of the broad assassination campaign. The committees first task for Israeli intelligence was to draw up an assassination list of all those involved in Munich. This was accomplished with the aid of PLO operatives working for the Mossad, and with information provided by friendly European intelligence agencies. While the contents of the entire list are unknown, reports put the final number of targets at 20 to 35, a mix of Black September and PLO elements. It is also known that Mossad agent Michael Harari led the creation and direction of the teams, although some may not have always been under government responsibility.
